TITLE INDEX, VOLUME 19 (1990)

A fine-grained account of Prolog execution for teaching and debugging 407
Analysing novices analysing Prolog: what stories do novices tell themselves about Prolog? 283
Assimilatory tools for informal learning: prospects in ICAI 3
Asynchronous communication, use for cooperative learning across classrooms 445
Building electronic communities: success and failure in computer networking 145
Classroom inquiry by students, facilitation by mathematical problem posing 219
Cognitive design for instructional design 437
Comprehending instructions for using pharmaceutical products in rural Kenya 71
Computer networking and electronic communities 145
Concept maps and Vee diagrams: two metacognitive tools to facilitate meaningful learning 29
Conversational levels in intelligent educational systems 11
Cooperative learning across classrooms in electronic Learning Circles 445
Design problem solving and the Instructional Design Environment 121
Effects of processing instructions on the usefulness of a graphic organizer and structural cueing in text 207
Generated meanings in the comprehension of word problems in mathematics 171
Graphic organizer and structural cueing in text, effects of processing instructions on usefulness 207
Informal learning in ICAI, assimilatory tools for 3
Instructional control of transfer and the ADAPT design model 89
Instructional design, cognitive design for 437
Instructional design, some implications of cognitive theory for 53
instructions for using pharmaceutical products, comprehension in rural Kenya 71
Intelligent educational systems: identifying and decoupling the conversational levels 11
Mathematical problem posing: implications for facilitating student inquiry in classrooms 219
Mathematical word problems, comprehension of 171
Meaningful learning using concept maps and Vee diagrams 29
Motivational design, clinical use of motivational messages in the ARCS model 467
Principles for the design of dynamic tracing environments for novice programmers 377
Prolog analyses by novice programmers 283
Prolog execution, a fine-grained account for teaching and debugging 407
Prolog novice programmers' initial problems 257
Prolog novice programmers' misconceptions of Prolog unification 361
Prolog novice programmers' misconceptions of the interpreter 311
Prolog novice programmers, dynamic tracing environments for 377
Prolog novice programmers, the influence of complexity and graphical notation on understanding 337
Prolog teaching, learning and use 247
Redo "TRY ONCE AND PASS": the influence of complexity and graphical notation on novices' understanding of Prolog 337
Some implications of cognitive theory for instructional design 53
Teaching, Learning and Using Prolog: Understanding Prolog 247
The ADAPT design model: towards instructional control of transfer 89
The clinical use of motivational messages: an inquiry into the validity of the ARCS model of motivational design 467
The Instructional Design Environment: technology to support design problem solving 121
Towards a taxonomy of novices' misconceptions of the Prolog interpreter 311
Understanding students' errors with Prolog unification 361
What's wrong? Understanding beginners' problems with Prolog 257
